

5. What will the future be like? There may be many new achievements in science and technology. Maybe our planet will become difficult to live on. Maybe human life will become very convenient. As for the future life, everyone has his own ideas. Here are some of my ideas about the future.

My first idea is about clean energy. We will have more and more clean energy. The pollution will be less. The second is artificial intelligence (人工智能). Robots have already played an important part in our daily life. In the future, many people will lose their jobs. It's not good. And the third is traffic. Buses, trains and planes will be much faster in the future. I hope there will be more ways to deal with traffic problems.

I have my own ideas about my future life. I think I will have a simpler life. I believe that I will live in a comfortable and quiet house with my family. What's more, I will not need to worry about my parents' health because everyone can live long.
